创造现实，成就梦想

# CREALITY

Upgraded Auto leveling  
CR-10S Pro Auto leveling 3D printer CR-10S Pro  
Automatic leveling  
Quickly heating up  
Resume printing  
Double gear extrusion  
High precision printing  
Colorful touch screen  
Filament detection  
Brand power supply

这些烦恼.....  
CR-10S Pro能为您解决!

耗材又堵头  
调平又失败  
精度太低  
拉丝太严重  
模型粘不稳  
断电打印失败

Troubles&Worries

CR-10S pro can help you fix it!

Plugging

Leveling failure

Low precision

Filament Stringing

Unstable

Can not resume printing

# CREALITY

## 参数

成型技术	FDM
打印尺寸	300*300*400mm
打印速度	≤180mm/s, 正常打印速度30-60MM/S
打印精度	±0.1mm
层厚	0.1-0.4mm
喷嘴直径	标配0.4mm 可换0.3、0.2mm
喷头数量	1
喷嘴温度	≤260°C
热床温度	≤110°C
工作模式	联机或SD卡脱机打印
文件格式	STL,Obj,amf
切片软件	Cura、Repetier-host、Simplify3D
电源参数	输入:100-240V 5.9A 50/60Hz 输出:DC 24V 21A
机器功率	480W
打印材料	PLA、ABS、软胶, 木质, 含铜, 渐变等
耗材直径	1.75mm

## Parameter

Molding Tech.:	FDM (Fused Deposition Molding)
Printing Size:	300*300*400mm
Printing Speed:	≤180mm/s, Normal 30-60mm/s
Precision:	±0.1mm
Slice Thickness:	0.1mm-0.4mm
Nozzle Diameter:	Standard0.4mm,can be in 0.2,0.3mm
Nozzle Number:	1
Nozzle Temp.:	≤260°C
Bed Temp.:	≤110°C
Working Mode:	Online or SD card offline
File Format:	STL,Obj,amf
Slice Software:	Cura, Repetier-Host ,Simplify3D
Power Supply:	Input:AC100-240V 5.9A50/60Hz Output:DC 24V
Total Power	270W
Fliament:	PLA,ABS,Wood,TPU,gradient color,carbon fiber,etc.
Fliament Diameter:	1.75mm

## 九大升级功能

让你想打就打

高贵的外观 \ 多样化调平 \ 快速升温

工业黑机身搭配酒红色配件，带给您极佳的视觉体验。

Nine Upgraded Functions  
Print what you want  
Elegant appearance \ diversified leveling \ Quick heating up  
Industrial black fuselage with wine red accessories for a great visual experience.

九大  
升级功能  
TOP.1

更智能的3D打印机

## 矩阵式自动调平 调平多样化

支持动态调平补偿, 可实时单点补偿, 调平强  
迫者的福音, 一次调平后续无忧。 同时支持自  
动调平和辅助调平两种模式。

触屏操控

设置补偿感应器

开始自动补偿

Nine upgraded functions  
More intelligent 3D printer  
Matrix automatic leveling  
Dynamic leveling fill gaps, single-point fix in  
time, easy leveling with both automatic  
leveling and auxiliary leveling modes.  
Touch screen control  
Compensation sensor Setting  
Automatic fill gaps

Diversified leveling  
With automatic leveling and auxiliary leveling, the leveling function is diversified and the printing accuracy is improved.

Manual leveling  
Manually leveling when you print,  
More troubling

升级功能  
TOP.2

更智能的3D打印机  
**CREALITY 3D**  
V2.4.1主板

四层PCB板, 使用固态电容滤波, 增加ESD静电防护, 性能更加稳定、可靠,TMC超静音驱动, 256细分, 打印更精细。

More intelligent 3D printer  
Creality 3D V2.4.1 motherboard  
Four-layer PCB board, support  
mechanical screen and two kinds of  
touch screens, use solid-state capacitor  
filtering to increase ESD static  
protection, performance is more stable  
and reliable, TMC ultra-quiet drive 256  
subdivision, print more precision.

V2.4.1 motherboard  
By TMC ultra-quiet drive 256  
subdivision  
Other Unknow motherboards  
Lower printing accuracy and come  
out with worse surface.

九大  
升级功能  
TOP.3

 **Capricorn**  
PREMIUM PTFE BOWDEN TUBING

## 进口铁氟龙管

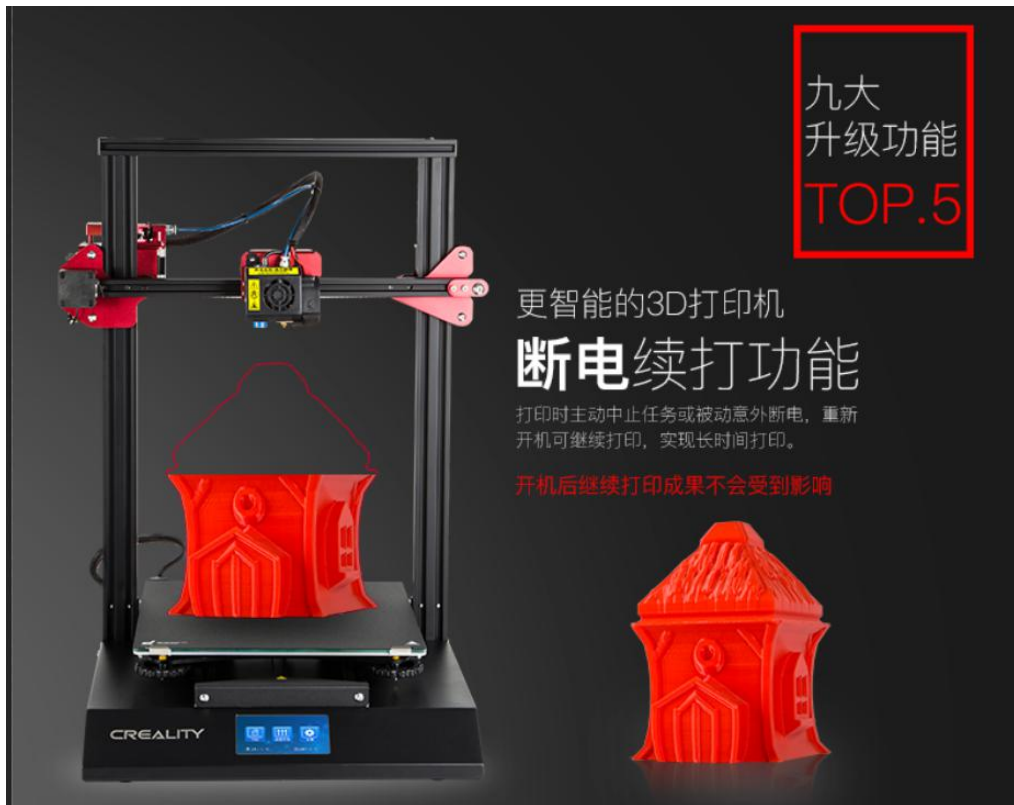

进口蓝色耐高温铁氟龙管，进料更加的顺滑，有效提升打印质量。

Imported Teflon tube  
Imported blue Teflon tube  
with high temperature  
resistant makes the  
feeding smoother, but  
improves the printing  
quality.

Touch screen  
Status display, function display,  
parameters  
All settings are clear to check

九大  
升级功能  
TOP.5

更智能的3D打印机

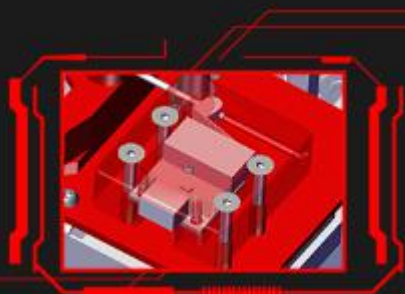

## 断电续打功能

打印时主动中止任务或被动意外断电，重新  
开机可继续打印，实现长时间打印。

开机后继续打印成果不会受到影响

More intelligent 3D printer  
Resume printing function  
Accidentally power off or suspend  
while printing, restart and continue  
printing, realizing long time print.  
The model will not be affected

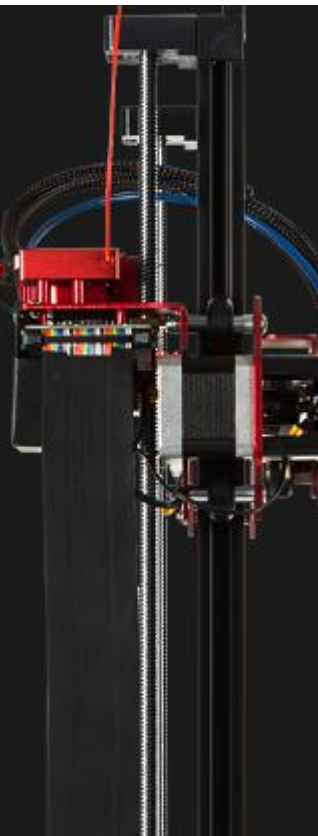

九大  
升级功能  
TOP.6

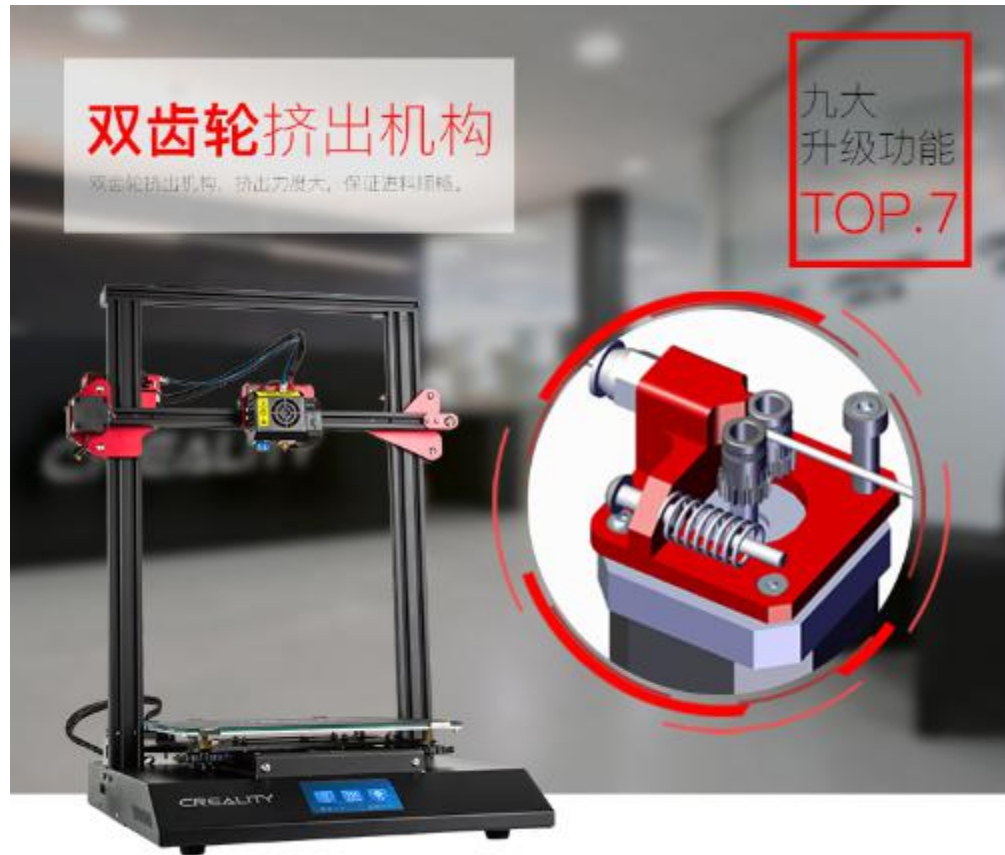

## 机械断料检测

断料检测开关，透明材料也能检测。断料时会自动  
停机。

Filament detection  
Filament detection switch,  
transparent filament can also be  
detected, auto shut down while  
running out of the filament

Double gear extrusion mechanism  
The double-gear extrusion mechanism has a large extrusion to make sure feeding smoothly.

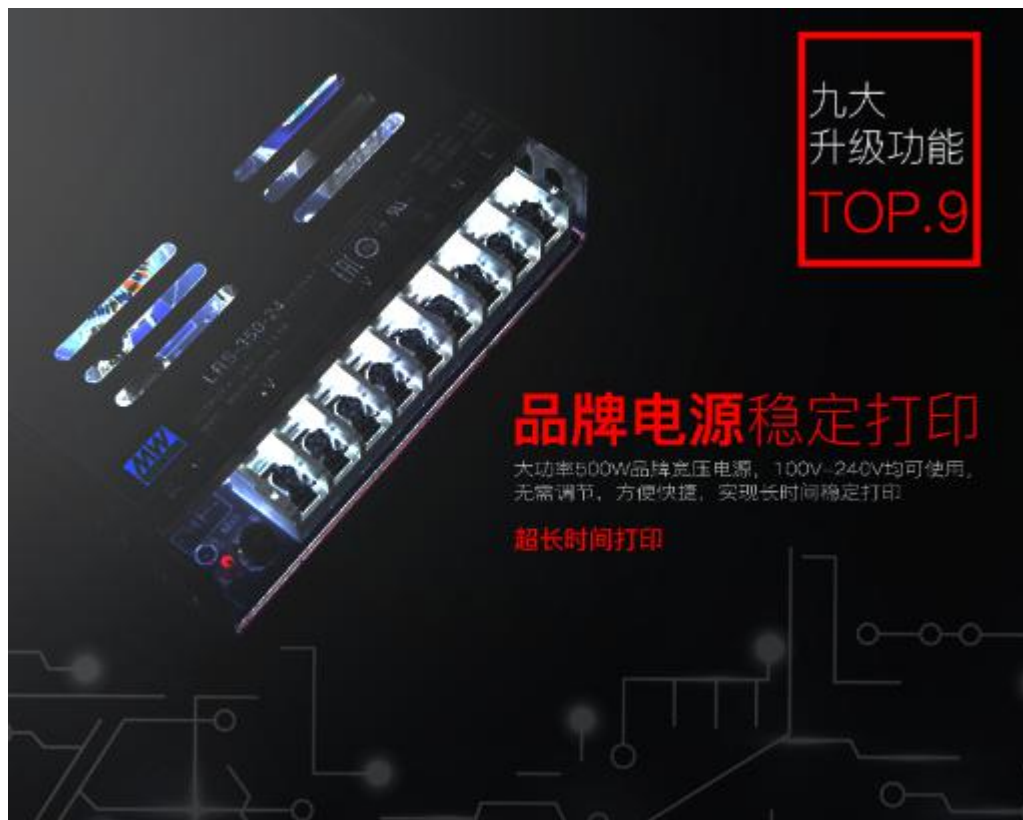

九大  
升级功能  
TOP.8

快速升温  
5分钟110°C

5分钟实现热床温度达到110度能够快速加温和  
打印各耗材的需求

Quickly heating up to 110 ° C only  
needs 5 minutes  
The temperature of the hot bed  
can reach up to 110 degrees 5  
minutes, realizing the requirement  
of quick heat up and print all  
various filament

九大  
升级功能  
TOP.9

## 品牌电源稳定打印

大功率500W品牌宽压电源，100V-240V均可使用，  
无需调节，方便快捷，实现长时间稳定打印

超长时间打印

## 品牌电源稳定打印

大功率500W品牌宽压电源，100V-240V均可使用，无需调节，方便快捷，实现长时间稳定打印  
超长时间打印

Brand power supply, realizing stable printing

High-power 500W brand power supply, which can use 100V-240V, no adjustment, convenient, realizing long-term stable printing  
Long time printing

product details

All real shots

Detailed tooth nozzle

the filament will not overflow, better airtightness

Oversized nuts design

Large nuts design makes it easier to level

Single-line design

Single-line simple horns, say goodbye to complex wiring.
